Ledger Agent

AI-Powered Accounting Operations

Continuous Financial Visibility · Natural Language Inquiry · Proactive Monitoring

Arpit Paliwal- Oracle ACE & Certified Consultant

WHAT IS LEDGER AGENT?

The NEW General Ledger experience — transforming accounting operations from periodic, manual processes into an agentic, natural-language-driven workflow.

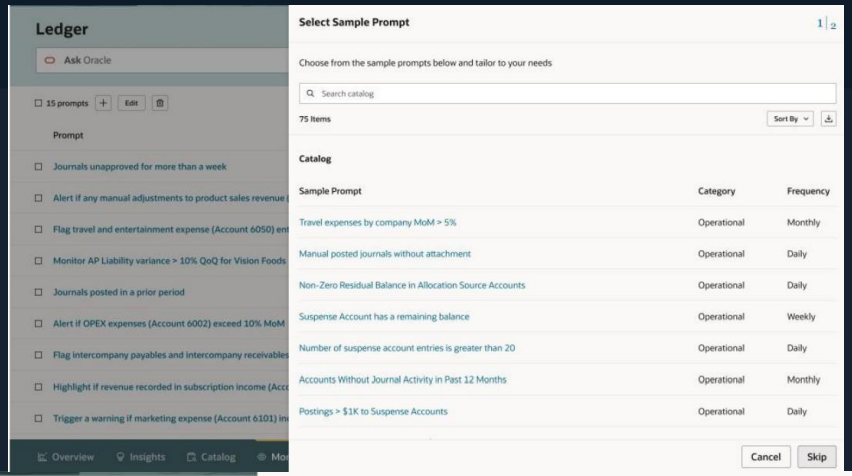
Day-to-day exception tracking via reports & spreadsheets	Agent-driven proactive monitoring of indicators & exceptions
Manual cross-functional collaboration for reconciliation	Natural language inquiry with context-aware explanations
Time-consuming manual journal adjustments	Full agentic GL experience for inquiry, actions & corrections

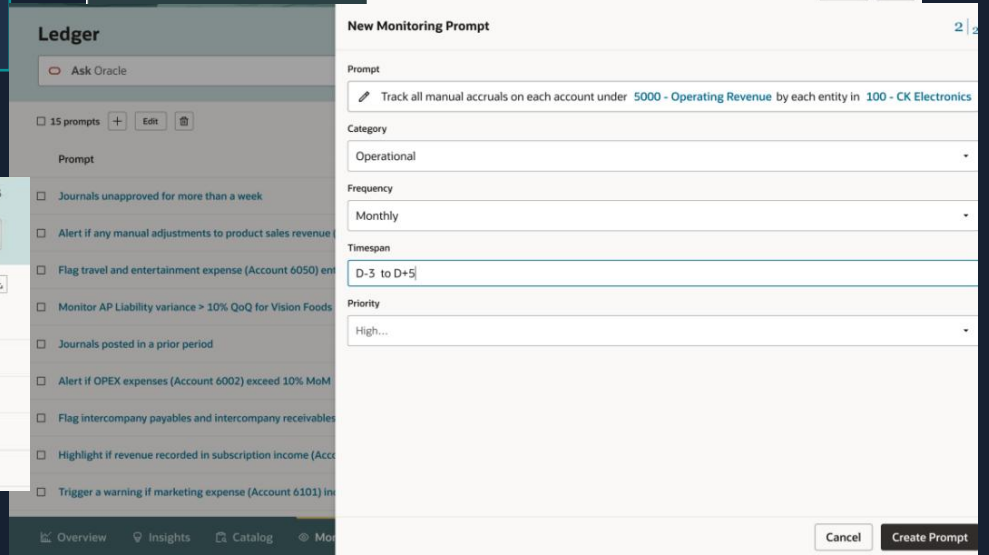
Result: High-quality, continuous financial visibility

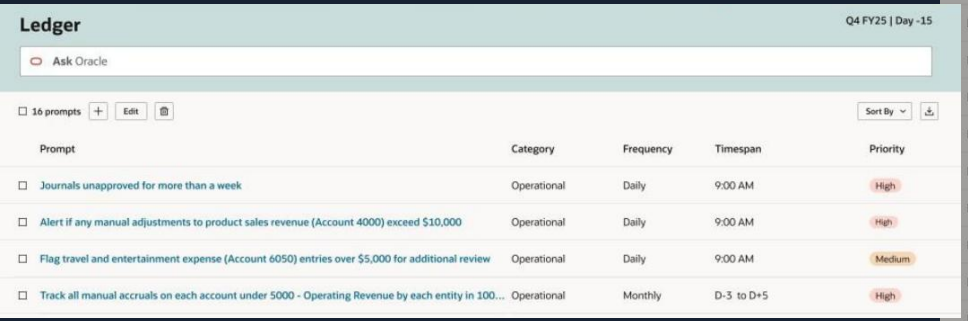
KEY CAPABILITIES — AVAILABLE NOW

Proactive Monitoring

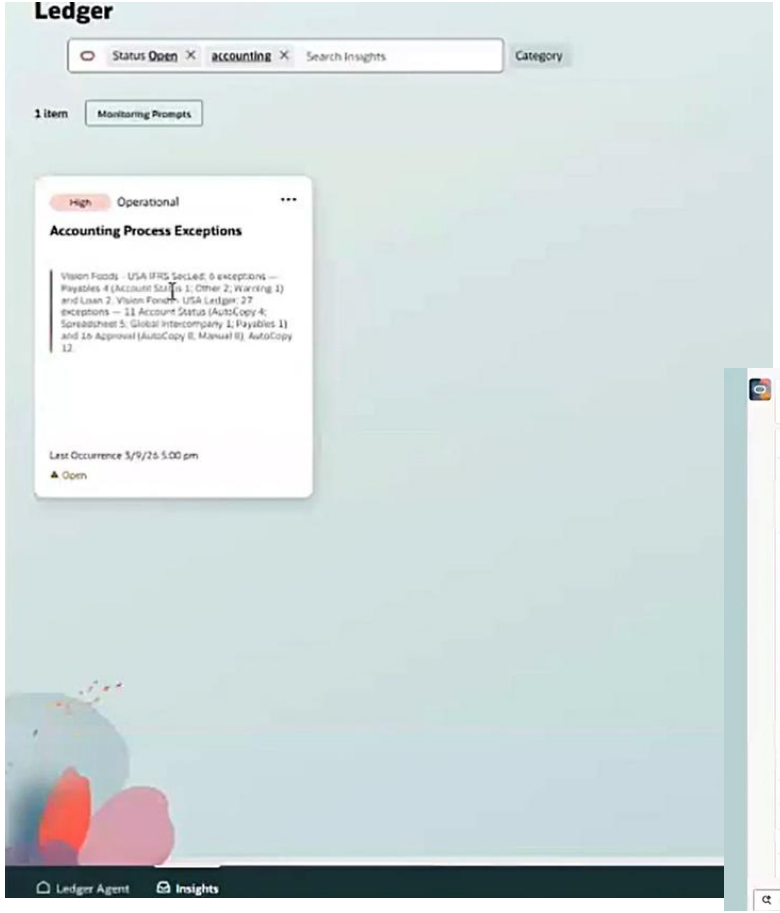
- Configure monitoring prompts in plain language
- Pick from a catalog of best-practice templates
- Set frequency (hourly → monthly) & time-window (D-5 to D+2)
- Surfaces insights only when your condition is triggered







KEY CAPABILITIES — AVAILABLE NOW



Insight Explanations

- AI-generated contextual summaries per insight
- Prioritised inbox (High / Medium / Low)
- Seeded daily insights for accounting exceptions
- Continue any insight into a full conversational analysis

Accounting Process Exceptions shows exceptions across Vision Foods ledgers. The **Vision Foods - USA Ledger** has multiple categories led by Journal Interface (Exception Count 14) and Approval issues (Exception Count 8 each for AutoCopy and Manual). The **Vision Foods - USA IFRS SecLed** contains smaller counts (highest: Warning from Payables with Exception Count 3).

Ledger	Exception Category	Journal Source	Exception Count
Vision Foods - USA IFRS SecLed	Account Status	Loan	1
Vision Foods - USA IFRS SecLed	Other	Payables	2
Vision Foods - USA IFRS SecLed	Warning	Payables	3
Vision Foods - USA Ledger	Account Status	AutoCopy	4
Vision Foods - USA Ledger	Account Status	Global Intercompany	1
Vision Foods - USA Ledger	Account Status	Loan	1
Vision Foods - USA Ledger	Account Status	Spreadsheet	5
Vision Foods - USA Ledger	Approval	AutoCopy	8
Vision Foods - USA Ledger	Approval	Manual	8
Vision Foods - USA Ledger	Critical Error	Manual	3
Vision Foods - USA Ledger	Journal Interface	Global Intercompany	14
Vision Foods - USA Ledger	Other	Payables	2
Vision Foods - USA Ledger	Period Status	Global Intercompany	1
Vision Foods - USA Ledger	Period Status	Manual	2
Vision Foods - USA Ledger	Period Status	Spreadsheet	1

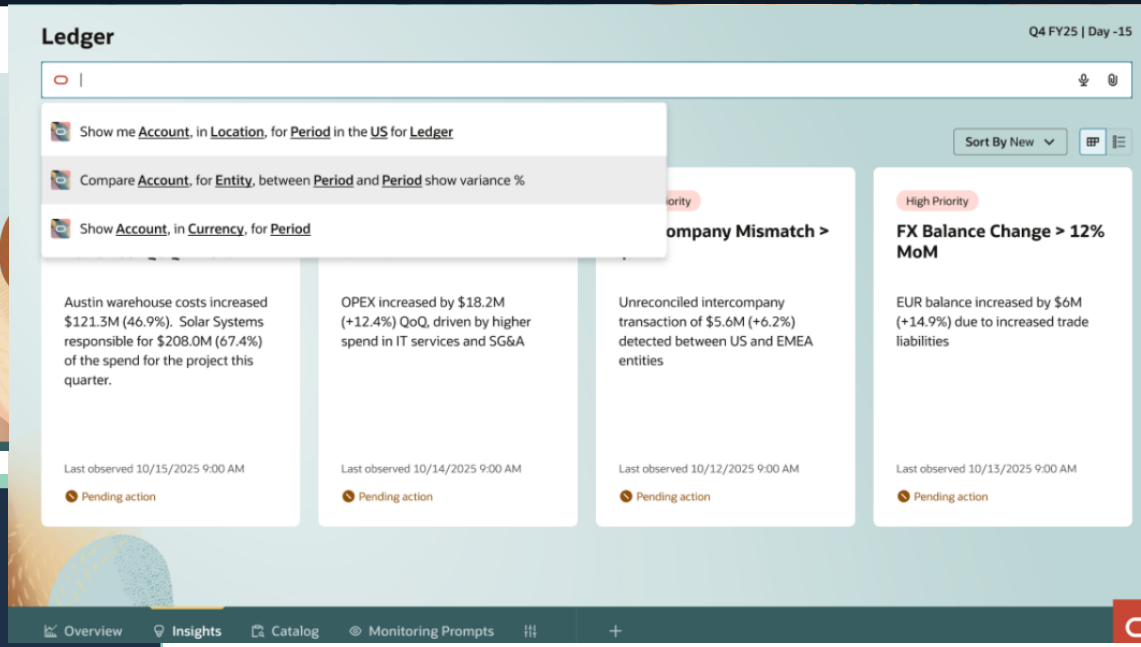
102 - CK Canada Ltd	1000 - North Americas Operations	22,000.00	25,000.00	3,000.00

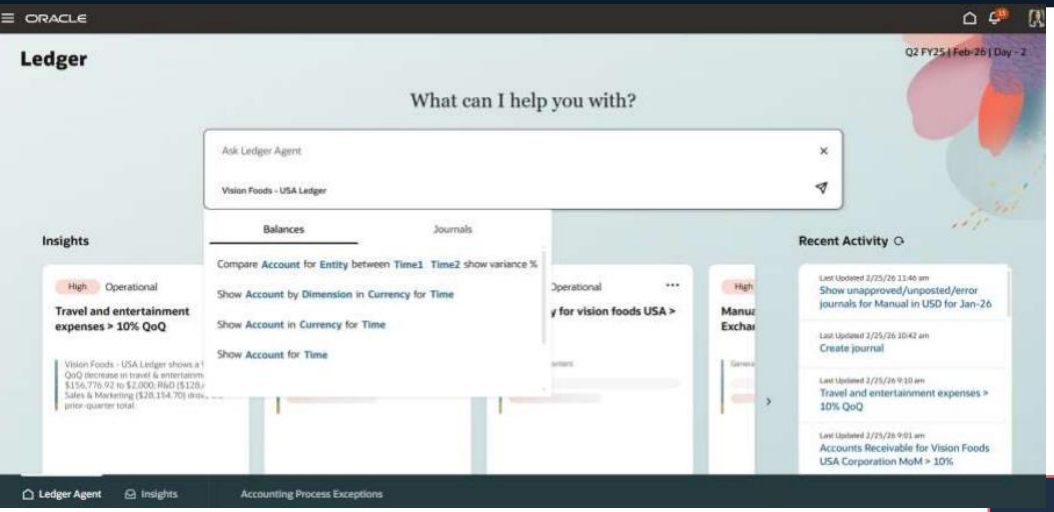
Ask Oracle

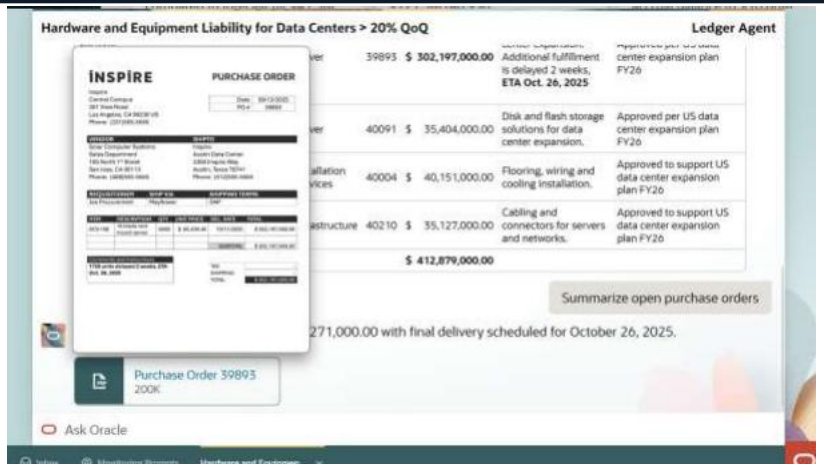


Natural Language Inquiry

- Free-form chat or guided prompt templates
- Context-aware: understands ledger, entity, period
- Drill-down from summary → cost center → invoice → supplier
- No IT or report dependency — answers just a prompt away

KEY CAPABILITIES — AVAILABLE NOW





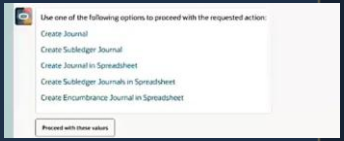
Account Analysis

- Balance comparisons across dimensions & time periods
- Visual summaries and supporting documentation inline
- Replaces manual export → pivot → analyse workflows
- Convert spot analysis into permanent monitoring prompt

UPCOMING FEATURES — ROADMAP

01 Connected GL Actions

Create reclassification journals, adjustments, and accounting corrections directly from an insight or analysis thread — without leaving the agent.



02 Reconciliation Differences

Automatically monitor and explain differences between Ledger and subledger balances, clearing accounts, and intercompany accounts.

03 Allocations

Author and preview allocation rules using natural language through the agent. Remove the complexity from allocation setup.

04 Financial Statements with Narratives

View financial reports directly in the agent, enriched with AI-generated narratives, summaries, and variance explanations.

05 SmartView Integration

Launch further analysis directly into SmartView from the Ledger Agent, combining the power of NL inquiry with familiar pivot analytics.

ADOPTION JOURNEY — FUNCTION BY FUNCTION

		Today's Mechanism		With Ledger Agent
1	**Variance Analysis**	Account analysis reports, Account Monitor	→	**Monitoring Prompts**
2	**Account Walk-throughs**	Inquire & Analyze Balances, Interactive Reports	→	**Guided Prompts → explore details**
3	**Daily Accounting Ops**	Account analysis / OTBI reports, Create Accounting	→	**Monitoring Prompts**
4	**Ad-hoc Inquiry**	Online Inquiry, Saved Searches, SmartView	→	**Natural Language + Guided Prompts**
5	**Operational Checks**	Account analysis, Journal reports with conditions	→	**Monitoring Prompts**

COMMON QUESTIONS — ANSWERED

Q **Does it replace our existing GL pages?**

No — Ledger Agent is add on. Existing journals, period close, and GL work areas remain unchanged. No Redwood migration needed.

Q **Can we create journals from the agent?**

Journal creation (reclassifications, adjustments) is a key upcoming feature. Actions capability is a top priority.

Q **Who can see monitoring prompts?**

Prompts are private by default. Accounting managers can share and assign prompts to team members for consistent organizational coverage.

Q **Is there a limit to monitoring prompts?**

No technical limit. Best practice: regularly curate and disable stale prompts as business conditions change each quarter.

Q **Does it support fixed assets and subledgers?**

Natural language interaction works across subledgers. Deep subledger NL responses (e.g. fixed assets) will expand in subsequent releases.

Q **Is training required for users?**

No formal training needed. Just ask the questions you already ask yourself daily — the agent understands natural business language.
